Thanks Josh. I'm looping in Pat Kuefler here.

Best wishes,
Heather

A reporter in Wassau has asked to see the the Juneau County well test results. Please advise on the response. If we are posting the test results online today, we can send the desk statement below, if that looks OK to you. I have tried to make it clear that the data has been collected from public right of ways, not well tests. Thank you.

DRAFT Desk Statement Juneau County

EPA has released the results of groundwater testing conducted on public right of ways near a large dairy in Juneau County. EPA's tests – and others conducted by the county health department -- found elevated levels of nitrates. Region 5 continues to work with Wisconsin DNR to evaluate the results and determine appropriate next steps. Both agencies will attend a county-sponsored public meeting on Tuesday, July 17. For more information, including the testing results: (-----NEED TO INSERT LINK ON MONDAY-----)
